# 2010

# 2015

# *Phomopsis* on sunflower

R1 = bud initiation stage

R5 = flowering stage

# Brookings, South Dakota

# Current Problems

- Phomopsis stem canker continues to be of concern.
  - Disease incidence between 40 to 100% in commercial fields  
(H. Kandel and T. Gulya, NSA survey).

# Current Problems

- Three fungi cause disease in the U.S.
  - *Phomopsis helianthi*
  - *P. gulyae*
  - *P. stewartii*

# Current Problems

- Alternative hosts have been identified.
  - Soybean is a host of *P. gulyae* in South Dakota  
(F. Mathew, S. Markell, and I. Lal, *unpublished*).

and Environmental Sciences

Results from ND & SD

# Current Problems

- Limited genetics available.
  - Several questions – if resistance holds up to multiple strains or pathogens?

# Solution?

# Solution?

- Fungicides?

# 2015 & 2016

- Fungicide efficacy trials were established at a total of five to six locations (ND, NE and SD).
  
- Disease severity index and yield data were obtained.

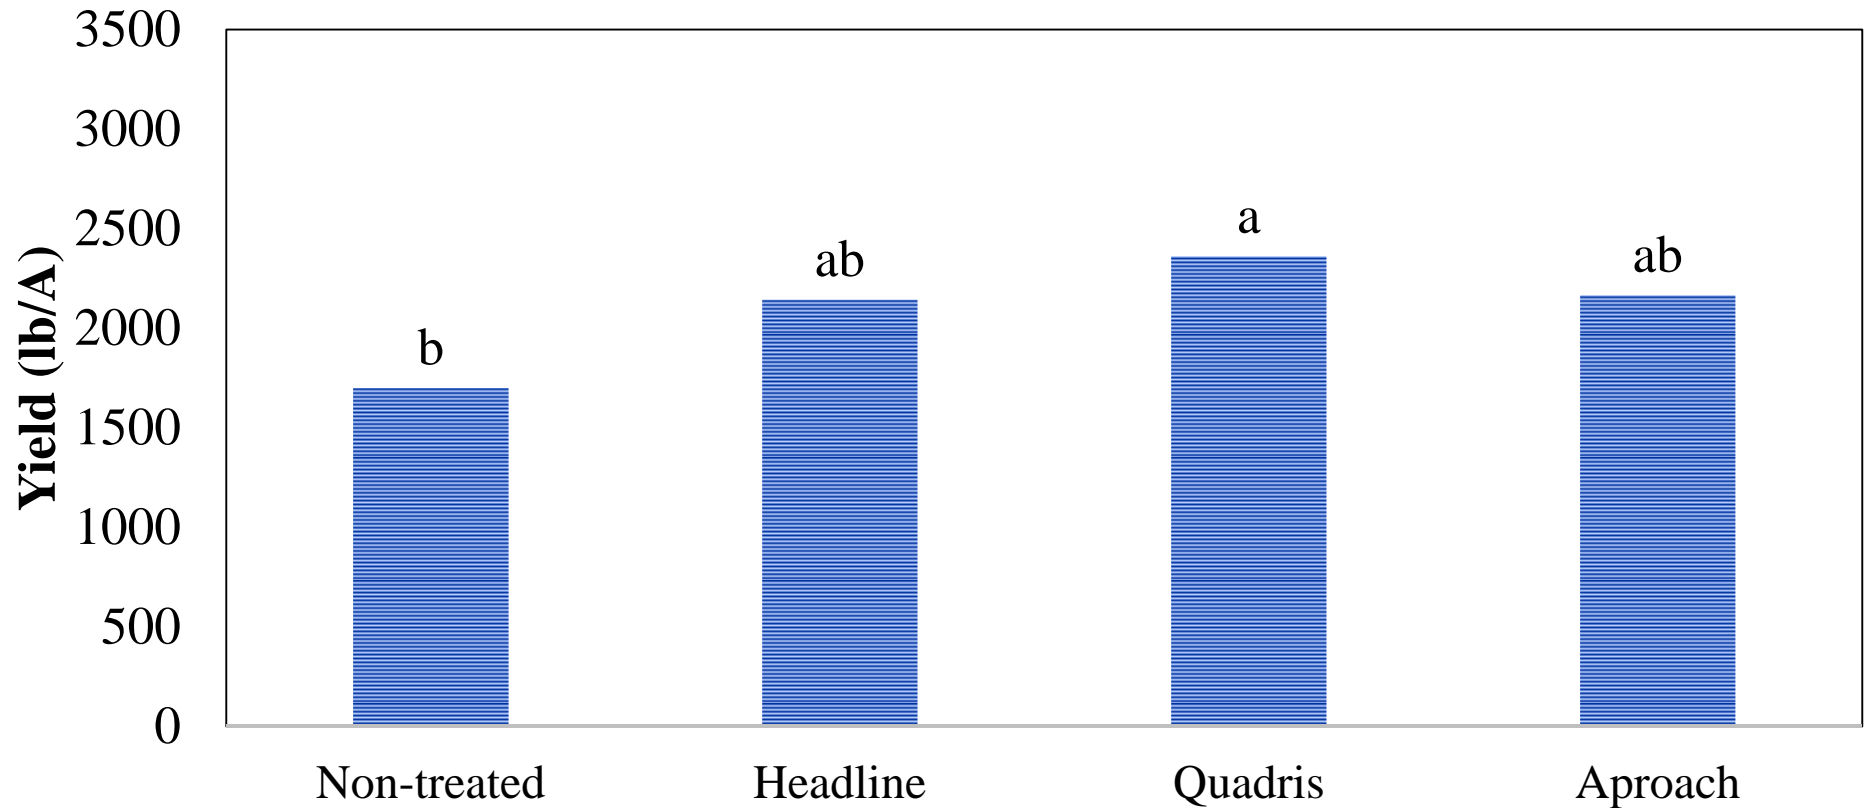

Rothsay, MN

# 2015 & 2016

## Fungicide treatments @ R1-R2

- Rothsay, MN
- Mycogen hybrids
- Fungicides @ 6 fl oz/A

# 2015 & 2016

S. No.	Treatment <sup>a</sup>	Susceptible <sup>b</sup>	
		DSI <sup>c</sup> (%)	Yield (kg/ha)
1	NTC	94.1 a	736.9 a
2	Quadris @ V12	86.9 ab	751.2 a
3	Quadris @ R1	84.1 ab	804.6 a
4	Quadris @ R3	93.8 a	564.5 a
5	Quadris @ V12 + R1	85.9 ab	711.5 a
6	Quadris @ R1 + R3	90.3 ab	688.4 a
7	Quadris @ V12 + R3	88.4 ab	778.2 a
8	Quadris @ V12 + R1 + R3	75.9 b	706.7 a
<b>LSD @ <math>P \leq 0.05</math></b>		<b>16.6</b>	<b>320.7</b>
<b>CV</b>		<b>12.9</b>	<b>30.4</b>

- Quadris @ 6 fl oz/A

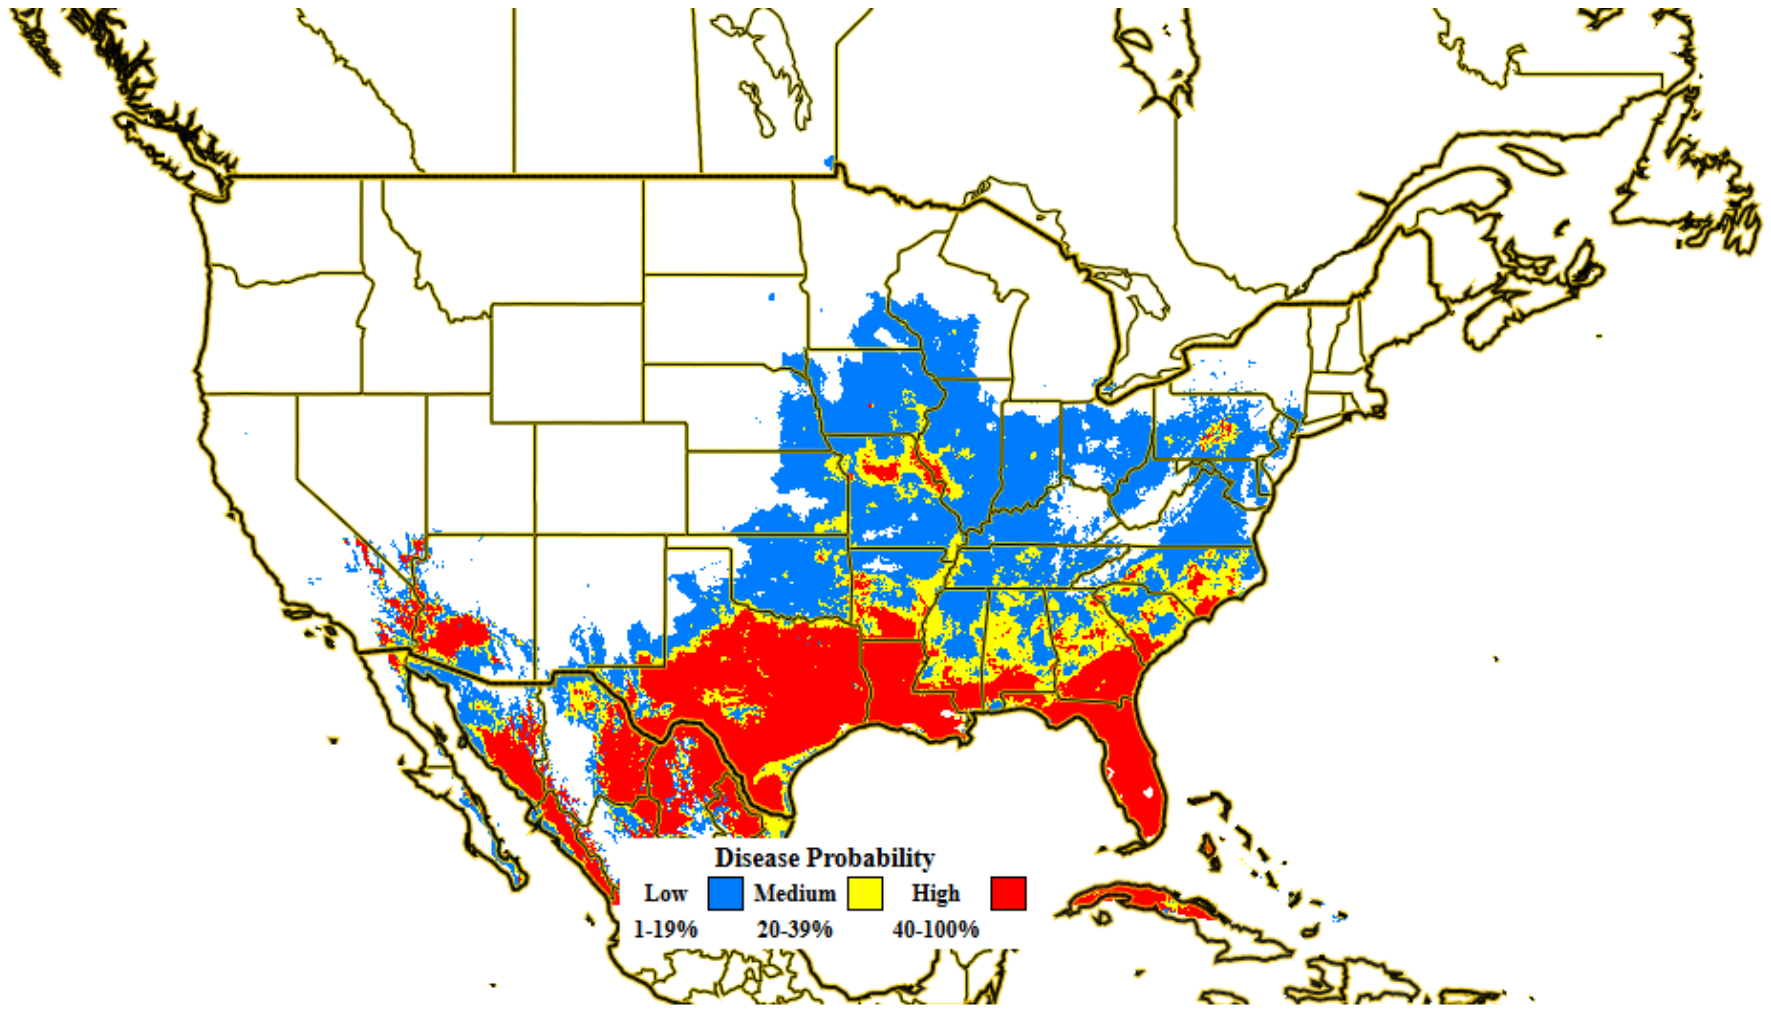

# 2017 & 2018

- The model was validated by setting up field trials at a total of five to six locations (ND, NE and SD).
- Growth stage based application was compared to that predicted by the model.
- Disease severity index was obtained.

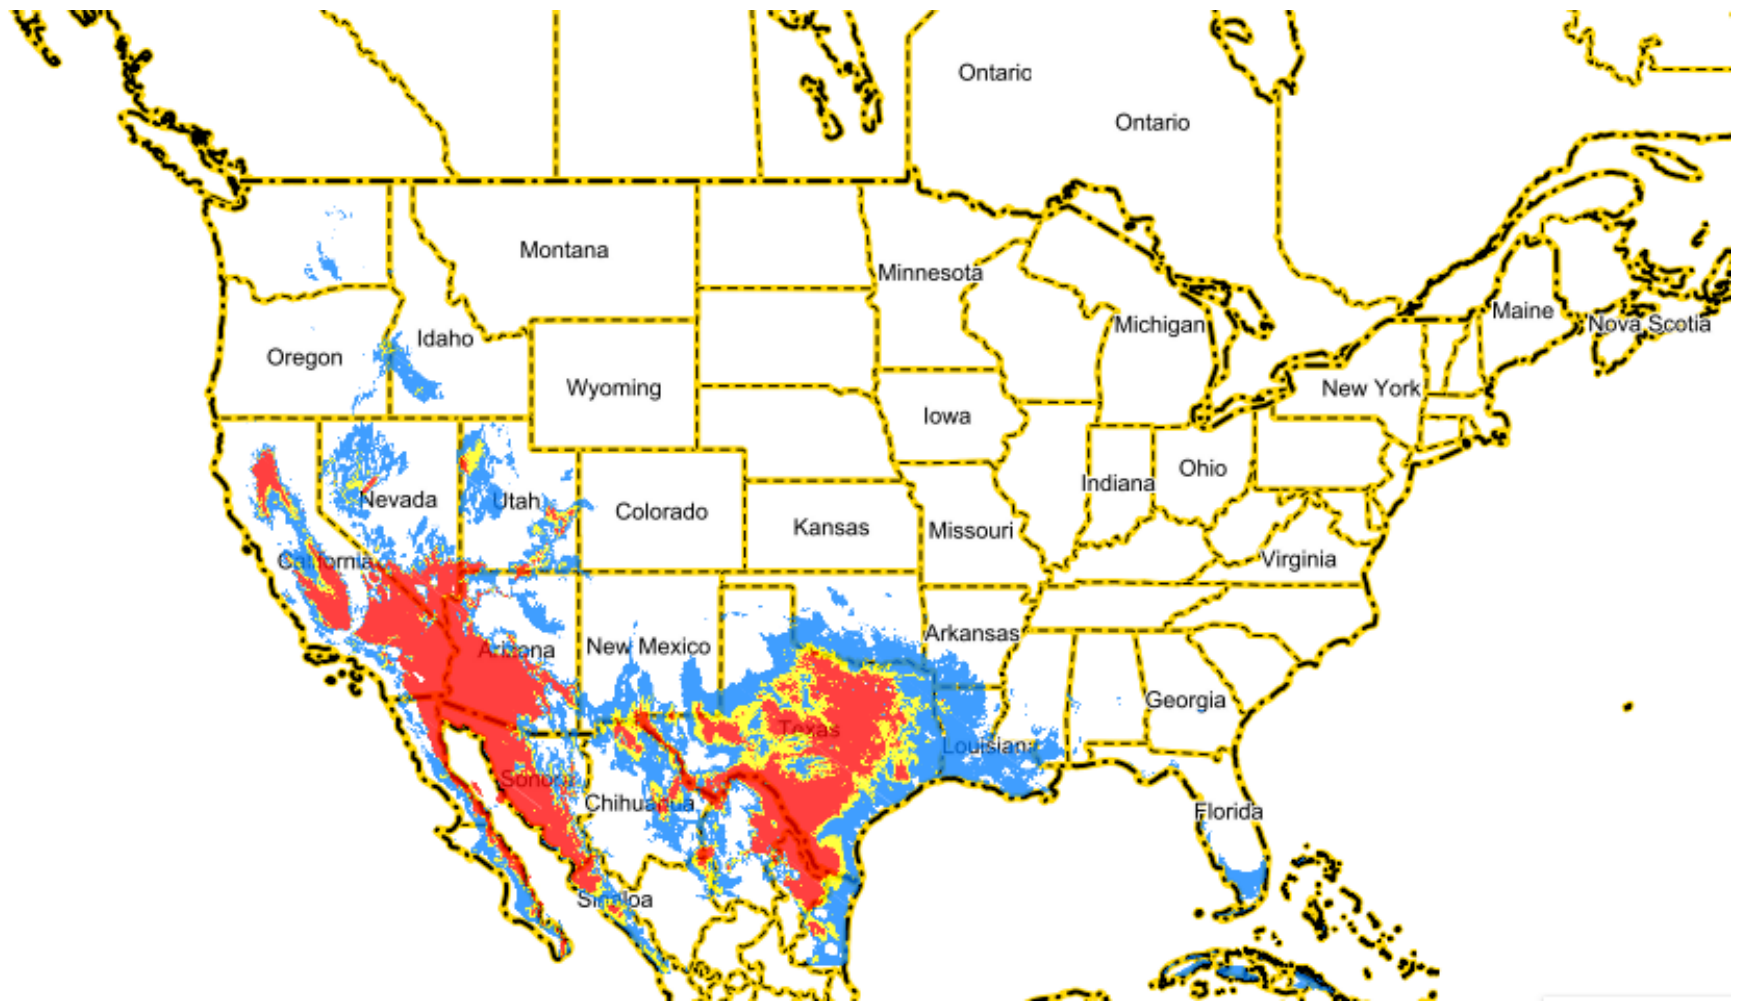

# 2018 – June 6

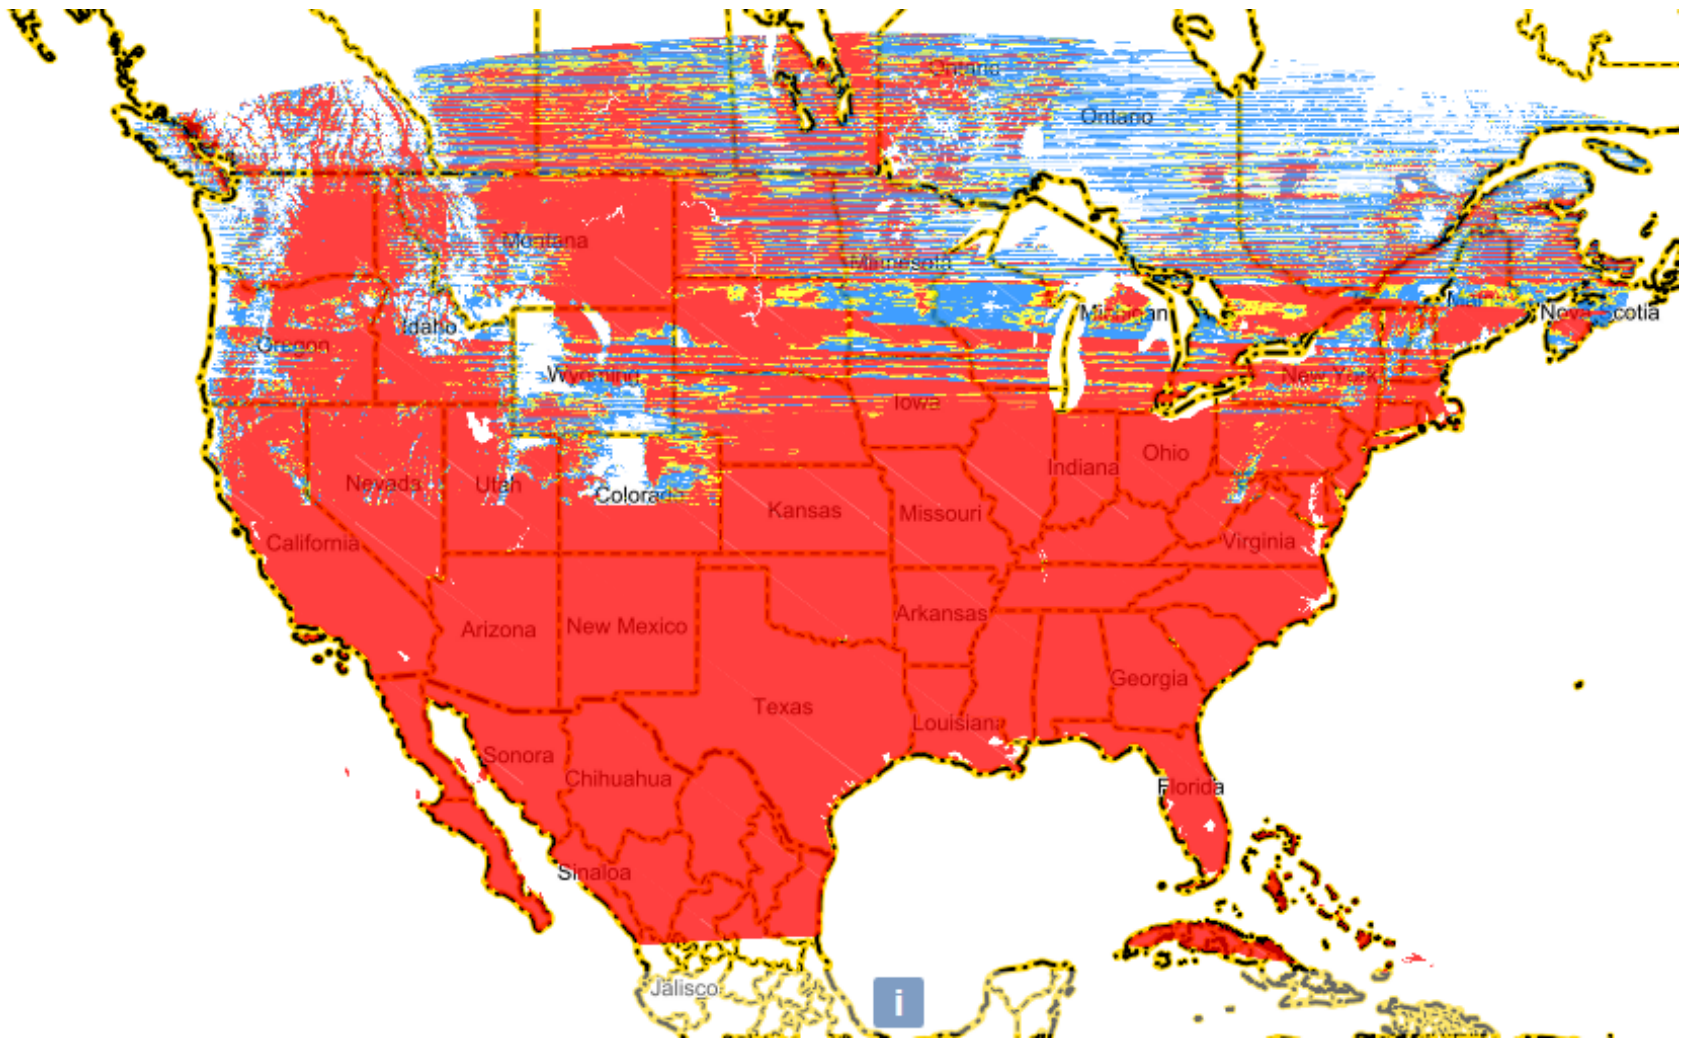

# 2018 – August 3

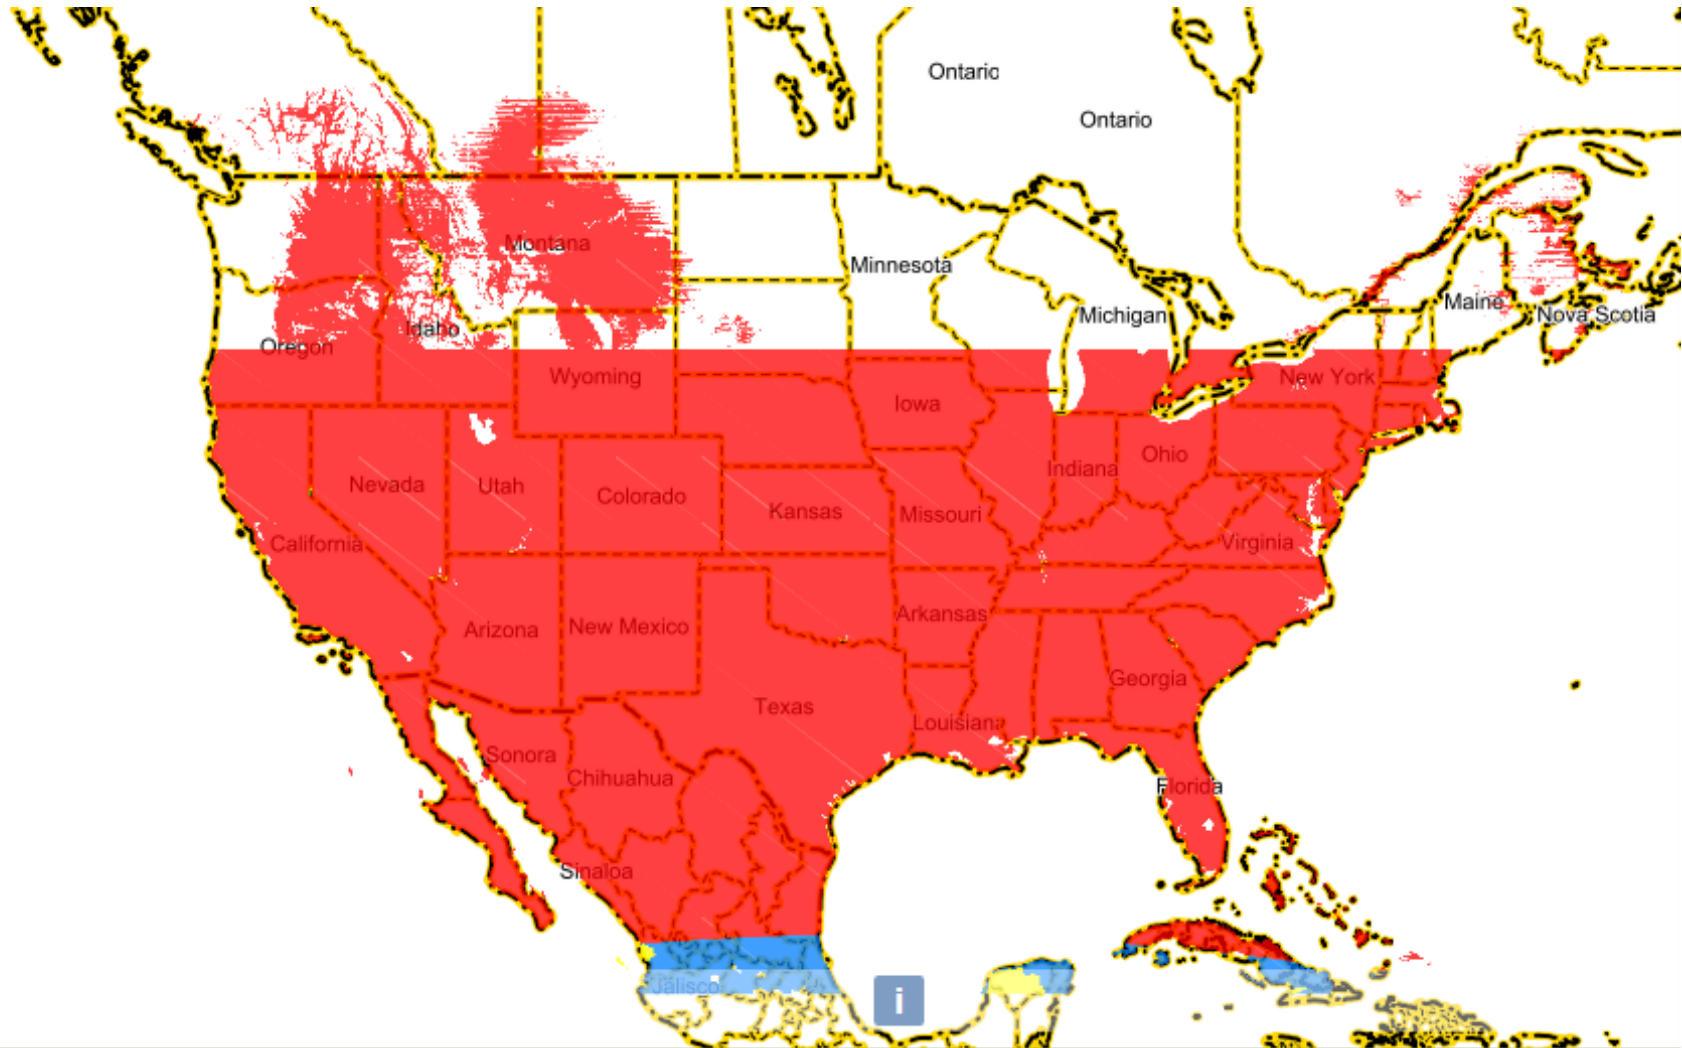

# 2018 – August 13

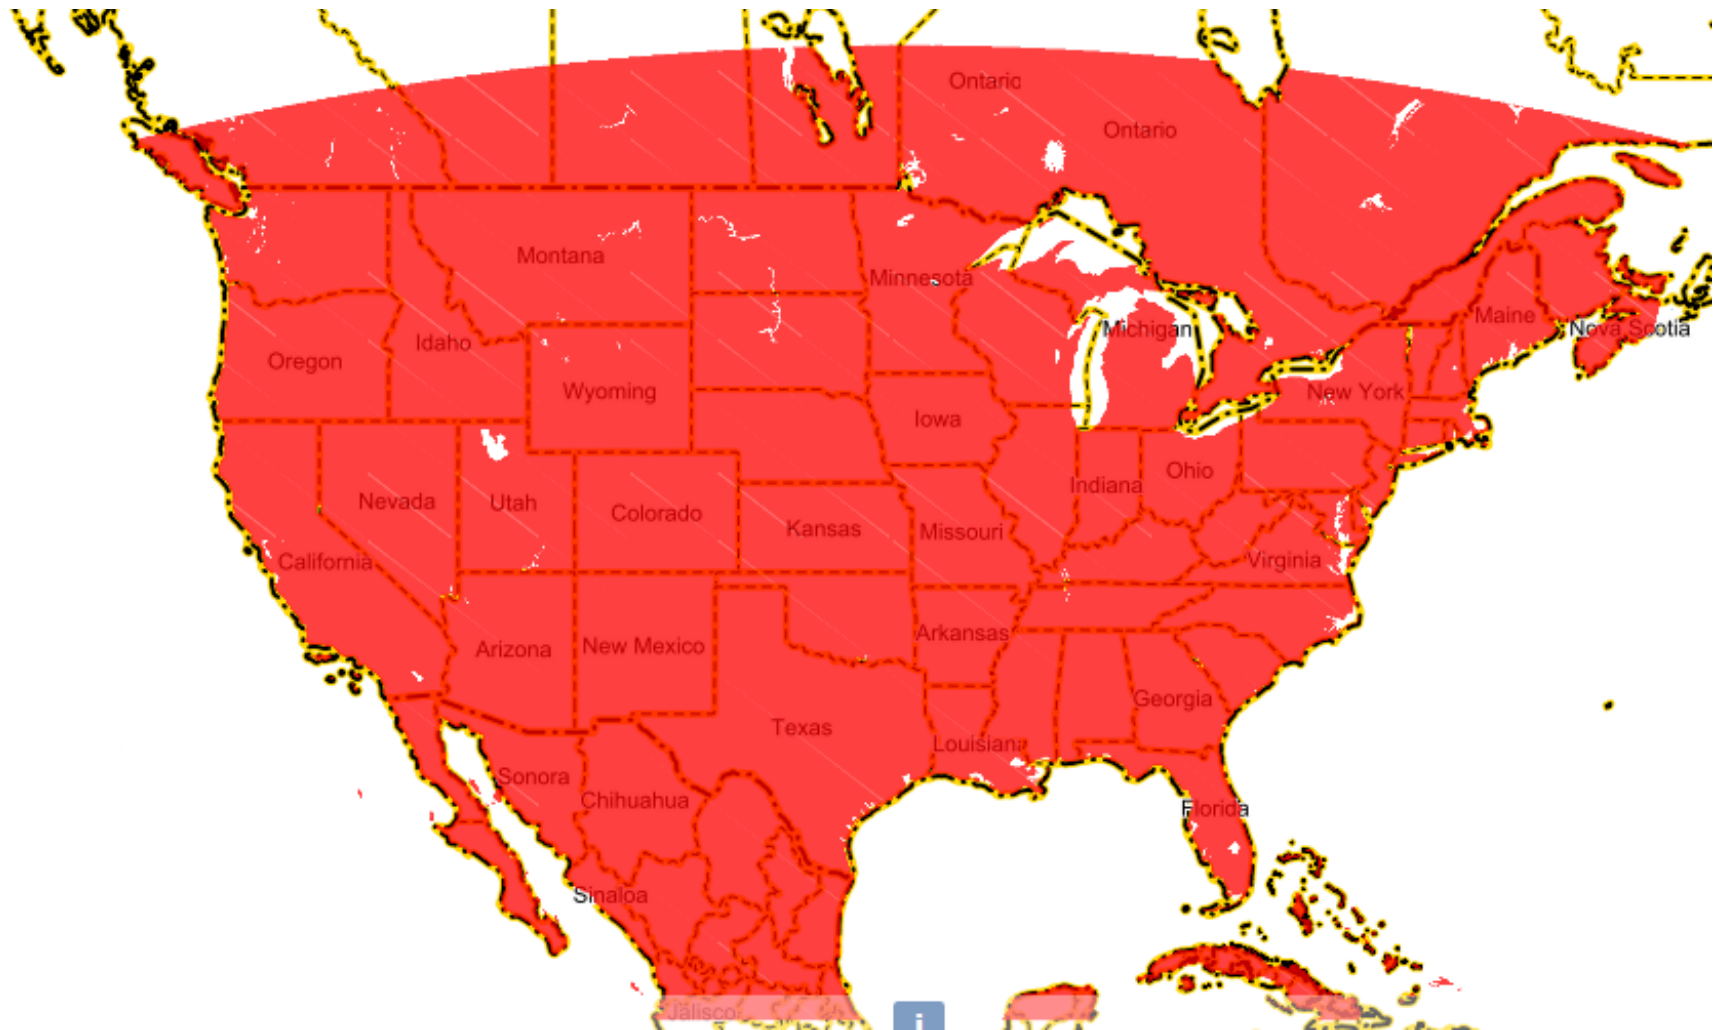

# 2018 – September 3

College of Agriculture, Food  
and Environmental Sciences

Brookings, SD

# 2018

- Efficacy of nine fungicides were tested on sunflower in Brookings, SD.
- Fungicides with single mode and multiple mode of action were used.
- Disease severity index was obtained.

**2018**

**SOUTH DAKOTA  
STATE UNIVERSITY**  
College of Agriculture, Food  
and Environmental Sciences

Brookings, SD

# Future plans

- Fungicide application at R1 maybe effective, but we need more location-years of data and test more chemistries.
- Examine disease etiology
